COVID-19 HASN'T GONE AWAY

Covid-19 testing guidance for children in Year 6 and below

Showing symptoms (this is day 0)

Keep the child at home & tell their early years/primary setting.

Get a confirmatory PCR test. Call 119 or book a test online at www.gov.uk/get-coronavirus-test

Positive result

Day (1-10) Continue self-isolating for 10 days after first day of symptoms.

Lateral flow tests generally shouldn't be used for children under 5 years. Do not use lateral flow tests on anyone displaying symptoms.

COVID-19 SYMPTOMS

- a high temperature this means they are hot to touch on their chest or back
- a new continuous cough this means coughing a lot more for an hour, or 3 or more coughing episodes in 24 hours
- a loss or change to sense of smell or taste

 this means you have noticed they cannot smell or taste anything, or things smell or taste different to normal

Negative result

Return to early years/
primary setting if child is
well (note: you should still
make a decision as normal
about whether your child
is well enough to return)

Anyone aged 5 years and over, who has been identified as a contact of someone with COVID-19 and who is not legally required to self-isolate, is now strongly advised to take a rapid lateral flow device (LFD) test every day for 7 days (or until 10 days since their last contact with the person who tested positive if this is earlier). If any of these LFD tests are positive they should self-isolate and book a PCR test

If you are aged over 18 years and 6 months and are not fully vaccinated and you have been informed by NHS Test and Trace that you are a contact of a person who has had a positive test, you are legally required to stay at home and self-isolate

Under 5s are exempt from self-isolation and do not need to take part in daily rapid lateral flow testing.

Return to early years/primary setting if child is well
